American Association of Orthodontists Foundation - Biomedical Research Award

Title: Genetic Factors in External Apical Root Resorption Associated with Orthodontic Treatment.

Investigators:

James K. Hartsfield, Jr., D.M.D., Ph.D., principal investigator
Riyad A. Al-Qawasmi, BDS
Eric T. Everett, PhD
Tatiana Foroud, PhD

Institution:

Indiana University School of Dentistry

Brief Summary:

Two genetic loci have been found that appear to influence whether a patient might have external apical root resorption associated with orthodontic treatment.
