

AAO Foundation Award Final Report

Principal Investigator	Maria Fernanda Orellana
Co-Investigator	NA
Secondary Investigators	Mahboobe Bajestan
Award Type	Orthodontic faculty development fellowship
Project Title	Recognition of malocclusion: Effectiveness of teaching dental students the index of complexity, outcome and need
Project Year	2010
Institution	University of California San Francisco
Summary/Abstract (250 word maximum)	<p>The proposed project was successfully completed. We assessed the effectiveness of a web-based, self-instructional ICON training program versus the traditional lecture followed by calibration sessions.</p> <p>Our results show that 2nd year dental students performed better than their counterparts.</p> <p>I have continued my training in clinical research taking a class in qualitative research design and analysis</p>
Were the original, specific aims of the proposal realized?	Yes. We had to reduce the sample size from 200 to 100.
Were the results published? If not, are there plans to publish? If not, why not?	A publication is currently under revision by the Journal of Dental Education. The manuscript was re-submitted on June 15 2011 after minor revisions.
Have the results of this	Yes. ADEA meeting 2011.

proposal been presented? If so, when and where? If not, are there plans to do so? If not, why not?
